## BRC PETROL - 2022 Fuel Request Form

---

**Fuel registration will be open February 15 - June 15**

**IMPORTANT for 2022:** The BRC Fuel Program has *limits* to the number of generators it can service per day. If you know your needs for fuel **delivery** please apply early as there will be a cut off once the program has reached capacity. \*This does not apply to fuel pickup at Hell Station.

The BRC Fuel Program is for registered Art Projects, Mutant Vehicles and Theme Camps with higher volume needs, as well as registered support vehicles. This fuel safety program is intended to reduce the amount of traffic transporting large loads of fuel into the event as well as the need for large fuel storage in camps. It is not available for passenger vehicles, RVs, and participants who did not go through the Art, DMV or Placement application process.

---

### Need Fuel?

Use this form to request access to fuel on playa as part of the BRC Fuel Safety Program during the 2022 Burning Man event.

**There will be no account registrations on-playa.**

All fuel registrations **must** take place between February 15 - June 15 in the fuel registration window so the department can plan pre-event, review each request and allocate resources effectively.

Not sure exactly how much fuel you will need? No worries, we just need your best estimate so we can determine how much fuel and the number of delivery trucks we will need to secure for this year's event. You can also ask us for your account breakdown from a previous year, just email [petrol@burningman.org](mailto:petrol@burningman.org). Once registered, further information will be emailed to you to finish setting up your account.

**Art Projects:** Dyed diesel is available for delivery to Art Projects with large diesel powered generators that will take 20 gallons or more per delivery and have clear access. For small generators or one that runs on gasoline you can fill-up your approved fuel containers at the Hell Station and transport them back to your Art Project. Propane is only available for delivery to Art Projects on the open playa, the Esplanade, 2:00, and 10:00 roads for cylinders of 100 lb. or greater capacity, and tanks of 25 gal. or greater capacity that have clear access. Smaller cylinders and tanks can be filled at the Hell Station during normal hours of operation and transported back to your Art Project.

**Mutant Vehicles:** Mutant Vehicles must fill-up at the Hell Station during normal hours of operation.

**Theme Camps:** Dyed diesel is available for delivery to Theme Camps with large diesel powered generators that will take 20 gallons or more per delivery. In order to be fueled, your generator must be no more than 20' away from your frontage street with a straight access for the fuel hose from a Lettered/Numbered Street. Generators may be located on **20' fire/servicing lane** in limited cases and with pre-approval. Fire/servicing lanes must not include any sharp turns or corners, trucks must be able to pass straight through to the Lettered/Numbered Street. For small generators or one that runs on gasoline you can fill-up your approved fuel containers (with secondary containment) at the Hell Station and transport them back to your camp.

*Two generators per camp are included with this program. Camps with more than two generators will require further review.*

*NEW for 2022: Due to limitations on the number of generators we can service per day, we have joined with the Placement Department to work with camps who want to share power grids. On your Placement Questionnaire and PETROL registration, please indicate if there is another camp you want to share a power grid with. Or email Placement and PETROL if you have already submitted. Help us reduce the number of generators in the city, build more efficient power grids, and reduce our carbon footprint.*

**Fuel Drums:** There will be a limited number of 50 gallon drums of gasoline and diesel available for theme camps with a max of 2 drums *or* 110 gallons stored in the camp at one time as per safety regulations. Camps with diesel generators that may not last 30 hours between delivered fills can request drums of dyed diesel as backup in case the generator needs topping off before their next delivery. The fuel drum option is also good for camps with small gasoline generators or clear diesel reefers. Drums are not available for filling mutant vehicles in camp, those should fill up at the Hell Station. Secondary containment systems and pumps are the responsibility of the camp and further information will be supplied to those who are approved for fuel drum delivery. \*Note: Fuel Drum requests will be prioritized by need and at the discretion of BRC PETROL, and are not intended for Mutant Vehicles.

---

## CRITICAL INFORMATION

**There are many updates to the Playa Fuel Storage Guidelines this year. You must read this page before proceeding with your application.**

[Fire Safety Agreement: Fuel & Hazardous Materials Storage Guidelines](#)

**I have read, understand and agree to all of the information in the Fuel & Hazmat Storage Agreement Page. \***

- ☐ Yes I have read the web page, understand and agree
- ☐ No I do not agree

---

## BRC Fuel Safety Program Application

**Before continuing, please note:** Each group should submit their request separately, even if they share a main fuel contact person. Separate accounts will be created for

every group for ease of tracking fuel.

---

**Which of the following are you representing in this fuel request? This is your PRIMARY category. \***

- ☐ Honorarium Art Project (Registered with Burning Man Art Department)
- ☐ Self-Funded Art Project (Registered with Burning Man Art Department)
- ☐ Theme Camp / Art Support Camp / MV Support Camp
- ☐ Village
- ☐ Camp within a Village
- ☐ Work Support Camp (Staff)
- ☐ Mutant Vehicle
- ☐ DMV approved support vehicle (includes Disabled Persons)
- ☐ Outside Service Provider
- ☐ None

**Which of the following are you representing in this fuel request? This is your SECONDARY category if you have one.**

- ☐ Honorarium Art Project (Registered with Burning Man Art Department)
  - ☐ Self-Funded Art Project (Registered with Burning Man Art Department)
  - ☐ Theme Camp / Art Support Camp / MV Support Camp
  - ☐ Village
  - ☐ Camp within a Village
  - ☐ Work Support Camp (Staff)
  - ☐ Mutant Vehicle
  - ☐ DMV approved support vehicle (includes Disabled Persons)
  - ☐ Outside Service Provider
  - ☐ None
- 

**Name of Project Lead registered with Burning Man (Enter the real name of the Lead person registered with Placement, DMV or Art Depts) \***

First Name

Last Name

**Project Lead Email \***

**Have you had an account with the PETROL Department in the past? (Check all that apply) \***

- ☐ No, I am new to the BRC Fuel Safety Program
- ☐ 2016
- ☐ 2017
- ☐ 2018
- ☐ 2019

**What is the approximate number of people within your camp? \***

---

**\*THEME CAMP GENERATORS and REEFERS\***

## CRITICAL INFORMATION

If your camp plans to receive fuel delivery from the BRC Fuel Safety Program this year (delivery is only available for dyed diesel generators of 20+ gallons per delivery) please include your generator and reefer location on your camp plan. Your generator must be no more than 20 feet away from your frontage street with a straight access for the fuel hose to reach it from the road, or on your 20' foot fire/servicing lane in order to be fueled (requires pre-approval). Fire/servicing lanes must not include any sharp turns or corners, trucks must be able to pass straight through to a Lettered/Number Street.

Clear unobstructed access that does not require fuel trucks to turnaround or backup will help us provide safe and efficient fueling. Be cognizant of your neighbors in placing your generator and find ways to block sound and exhaust while still maintaining clear access for PETROL trucks. Camp maps will be reviewed for generator placement approval.

*Two generators per camp are included with this program. Camps with more than two generators will require further review before approval.*

Please provide a copy of your camp layout if you are requesting deliveries to your camp. You should be complying with guidelines on the following pages:

### [FUEL AND HAZMAT STORAGE](#) [CAMPS & PLACEMENT](#)

**Delivery Services:** We will review the [Theme Camp Map](#) before confirming any delivery services of fuel to generators, reefers or fuel drums. If your Theme Camp map does not have clearly marked fuel assets and safe access roads, you will need to revise and send an updated map to [petrol@burningman.org](mailto:petrol@burningman.org)

\*\*\***Subject: Your Camp Name: PETROL Map Submission**

## POWER SHARING

In the Placement Questionnaire there will be a question as to whether you wish to share power with another group, and you will be able to name that group. It doesn't guarantee you will be neighbors, but we are trying to work with Placement to help Theme Camps share power grids, and thereby reduce the number of generators in the city and hopefully guide the city towards more power efficiencies and reduced fuel usage.

**Please give the name of the camp(s) you plan to share a power grid with.**

\*Once camps are approved with Placement, PETROL will work with all listed camps and camp leads to set-up a PETROL account. All camps must register for a fuel account, even if they have plans to share a power grid.

**Type of equipment to be fueled: (Choose all that apply) \***

- ☐ Generator (Art Project)
- ☐ Generator (Theme Camp)
- ☐ Reefer
- ☐ Heavy Equipment
- ☐ Mutant Vehicle / Support Vehicle
- ☐ Portable Fuel Tanks (less than 110 gallons)
- ☐ Small Fuel Containers
- ☐ Propane Tank or Cylinder
- ☐ Drum of Fuel

**We suggest you have fuel containers on hand as a backup method of receiving fuel. Will you have fuel containers that are certified by either CARB / EPA / DOT ?**

- ☐ Yes
- ☐ No

**Where will you receive your fuel? (check all that apply) \***

- ☐ Fill up at the Hell Station (10:00 & L)
- ☐ Delivered to Theme Camp - direct delivery of dyed diesel
- ☐ Delivered to Theme Camp - fuel drum delivery (REQUIRED TO CHECK "Drum of Fuel" in "Equipment to be Fueled")
- ☐ Delivered to Theme Camp - propane
- ☐ Delivered to Art Project (minimum delivery amount and generator size applies during event. Propane available for delivery if criteria has been met. See info above under "Art Projects" for details)

**Estimate your daily fuel needs (in gallons) for each fuel type. \***

Is there anything else you need to tell us about your equipment or needs?

If you participated, how was your experience with the BRC Fuel Program in 2019?

Thank you!

BRC PETROL will **follow-up as you register, with final reviews by mid-July:**

1. To review Theme Camp Layout map w/ generator placement

2. To discuss and clarify fuel requests

3. Pre-approval of fuel account

BRC PETROL will **follow-up in early August:**

1. To provide final approval of account registration (after potential changes/updates)
2. To collect copies of identification to be matched on playa
3. To obtain a credit card to keep on file for fuel payments

In order to activate your account on playa, either the Project Lead or the Fuel Lead will need to come to the Hell Station with identification (license or passport) and credit card to verify they are the account holder and designate the assets to be charged to their account. When assets are being registered in Camp the same procedure will take place, no proxies will be accepted. Copies of identification will be logged on account activation. Only the credit card holder will be allowed to designate assets to charge to the account. Keep this in mind when choosing your Fuel Lead.

Account activations must take place on playa THE DAY BEFORE you want your first fuel delivery so it can go on the next day's schedule.
